

# Animal Reports

1. Choose an animal to study. Look up information about that animal in books, online, or in other resources (I will link animal books from Epic in our Google Classroom).
2. Fill out the following information on in the different flaps of your report paper:

Animal Name
What is their appearance?
Where is their habitat?
Tell about their babies.
What food do they eat.
Share 1 interesting fact.

Draw and write where possible the appropriate information on the form. **Keep it simple (one sentence per page)** so that your student can share the information easily with the class.

3. Practice sharing your report. Remember to:

- Speak loudly and clearly
- Stand up straight facing the audience.
- Show the pictures in your report.

There will be a link to record a video of your child sharing their animal report in *Google Classroom*.
